

## Executive Summary

---

### **Vision Statement**

Mayhew Technology Solutions is defined by three fundamental values; act with integrity, provide quality services and products; achieve excellence in every endeavor.

### **Mission Statement**

To make it easy to do business with us by delivering value and meaningful results to our customers.

Mayhew, who is an Air Force veteran, founded MTS in September 2017 with a goal to become a premier solutions provider of structured cabling - low voltage services and products, facility support services, and temporary staff augmentation. To achieve this goal, Mayhew believed it was critical to leverage her 30+ years government experience, business and management expertise, and industry knowledge in order to set the right foundation for MTS' growth. Mayhew understood the value of the various small business designations the company was eligible for, which often can "tip the scale" in the procurement process and help customers achieve small business utilization goals.

MTS has strategically pursued and obtained the following socio-economic/small business certifications:

- SBA 8(a) Certified
- VIP Service-Disabled Veteran/Veteran-Owned Small Business (SDVOSB/VOSB)
- Certified WBE/WOSB/EDWOSB
- SBA Hubzone Small Business (HUB)
- Oklahoma Department of Transportation (ODOT) – Disadvantaged Business Enterprise (DBE).

Our portfolio of services and products include design, installation & deployment, test and inspection of wired and communications infrastructures and systems, surveillance and access control, IOT, audio-visual, facility-support services, temporary staffing and consulting services.

To deliver consistent results, MTS must be the standard for delivering the right service and products, at the right price, at the right time – **every time**. MTS has partnered with leading manufacturers and distribution partners, such as Anixter, Graybar, Grainger, Westcon-SYNNEX, Tech Data, Lenovo, Cradlepoint, LG, and other various materials and products across electrical/data comm, and IT/IOT suppliers.

Our customers include the Department of Veterans Affairs-Central Texas, Department of Veterans Affairs-Amarillo, Texas, United States Air Force-Tinker AFB, United States Army Corp of Engineers-SW Little Rock, Department of Veterans Affairs-Oklahoma City Medical Center, ODOT as a DBE subcontractor, Wichita & Affiliated Tribes of Oklahoma, and several small businesses.

MTS looks forward to earning our customer's business and delivering best-in-class solutions that meet or exceed requirements and expectations.
